Acknowledgements

- I am thankful to everyone who has helped me on this journey of completing my app development–my parents, Ms. Sanjana, Mr Ken Kahn and Kaggle for providing me with the code to help me out.

About Me

- Hi , I am Anandini I am 16 years Old I am from modern school and I love to bake I am a grade 4 pianist and I am an avid Reader . I love AI and I got into this workshop as I was working towards a social cause and I saw an opportunity to develop an app that could help me and even make other people aware about this cause so I joined and it has been a vey fun journey since then .

About my internship journey with clevered

- My journey has been a lot of fun and the mentors are very helpful and friendly and even all the students that I am working with are very helpful and very fun to be with . I have also learnt a lot about ai and the app that I am working on has been very interesting and I am enjoying it quite a lot.

About The App

The app that I am working on helps us to detect rotten fruit from fresh ones and it will be extremely helpful to farmers and even sellers of fruit as they can easily detect the rotten fruit from the fresh ones using a simple app and wont have to go through much trouble . It can also help people at home detect If their fresh produce is rotten or good to eat .

How To Use The App

Once my code is finished, there will be an option to take a picture of the produce so that It will be very easy to identify and it wont be a very confusing app so that everyone can use it pretty easily and wont be a tough procedure and it should also be a helpful app for the community

Toolkit Walkthrough
